The professional B7017DH soap dispenser is an indispensable element of any store, hotel, shopping mall, and other public places. The B7017DH dispenser has a built-in intelligent infrared sensor thanks to fluid consumption is economical.

The dispenser has two modes of fluid administration (mode I ~ 0.5 ml, mode II ~ 1 ml), which can be set when the product housing is opened. In addition, the integrated nozzle allows spraying a fine mist and dosing the amount of the sprayed substance, which ensures precise control of the consumption of the disinfectant liquid. The housing of the B7017DH dispenser is made of durable ABS plastic. The whole has a white finish. In the central part of the housing, there is a window that allows you to control the level of the liquid inside. However, in the lower part of the dispenser, there is a drip tray, which guarantees cleanliness during use.

The dispenser's capacity is 1200 ml (internal container), while its overall dimensions are 160 x 117 x 285 mm. The dispenser with the drip tray can be powered in two ways, either battery-powered (4x AA) or by means of an AC / DC 6V 1A adapter (not included).
