The 9008T button thermostatic time battery is made of chrome-plated brass and is perfect for public use. The offered faucet has a built-in mixer so that the user can change the water temperature on his own. What's more, the 9008T model uses a modern TMV3 thermostatic expansion valve. TMV series valves are used in general refrigeration, they are used in devices with one or more cooling circuits.

The 9008T faucet is equipped with two 1/2" connections. Starting the water flow is possible thanks to the button, the flow time lasts from 8-15 seconds ± 5 seconds (depending on the settings entered). Moreover, the manufacturer has set the maximum water temperature to 38 °C at the factory. adjustable.
