

Children's battery B221

- The body is made of brass, covered with epoxy paint
- ECO-STOP function to prevent excessive water consumption
- Children&HASH39;s-friendly colors
- Spout equipped with an aerator
- Vandal-proof design
- Exceptional durability and reliability
- The product is entirely made in the European Union
- Simple operation
- Easy to assemble

Option	For mixed water
Connector	2xG1/2
Design	Brass covered with epoxy paint
Start	By lever
Water pressure reductor	up to 6l / min.
Water temperature	5-65°C
Water pressure	Min 1 bar - Max 6 bar (Recommended 2-4 bar)

Wall-mounted washbasin mixer with ceramic mixer. Equipped with the ECO-STOP function. Used in schools, kindergartens and children&HASH39;s hospitals.

In children&HASH39;s washbasin, there is a special cartridge where with the first opening you have a flow rate of 3 l/m (you will feel a "stop"), then you can open completely and the flow rate is 6 l/m. This means the cartridge has 2 steps for opening. Furthermore, there is a ring on the cartridge, and by positioning the handle, you can manually select the maximum water temperature. In that way, children won't get burned by too hot water.
