

Shower tray PD91

- Greatly facilitates the use of showers for people with disabilities
- Installation in the floor
- Low profile
- Anti-slip coating

Material	Polyester resin
Color	White
Installation	In the floor
Dimensions	900 x 900 x 35 mm

Non-threshold shower trays significantly improve the comfort of using the shower for disabled people in a wheelchair. Installation at the floor level causes trouble-free rolling of the wheels onto the tiles and shower tray threshold. The non-slip surface improves the safety of people using the shower equipped with a no-threshold shower tray.

The minimum height of the shower tray facilitates installation on the floor and does not require deep cramming into the floor. The shower tray is equipped with a wide drain hole thanks to which service activities are reduced to a minimum.
