

Stainless steel inrun tray PD90S PD90S

- Made of AISI 304 stainless steel
- Non-slip coating Inox matte finish
- High resistance to mechanical damage
- High resistance to corrosion and rust
- Fall to the drain
- The weight of the paddling pool is 9.5 kg
- G1/2 plug included
- Easy to clean
- Exceptional durability and reliability
- Easy to assemble
- Certificate of the Polish Institute of Hygiene
- CE declaration of conformity
- National Declaration of Performance

Material	stainless steel 304
Dimensions	900X900X30 mm
Finishing	Inox 304 Matt
Weight	9,5 kg

The non-threshold, accessible paddling pool for the disabled with a side outlet is a product made of the highest quality components. The shower tray is made of AISI 304 stainless steel, which is characterized by high durability, resistance to mechanical damage and insensitivity to rust and corrosion. The top layer of the paddling pool is smooth and has a non-slip surface to prevent accidents. The total dimension of the ramp area is 900 x 900 mm. The PD90S access paddling pool is a significant facilitation for disabled people or those who use a wheelchair. The thresholdless structure ensures stability and safe entry of the wheelchair. The inrun PD90S series shower trays are most often used in public bathrooms, hospitals and nursing homes. Importantly, the PD90S shower tray is certified by the Polish Institute of Hygiene, CE Declaration of Conformity and the National Declaration of Performance.
