

Stainless steel shower tray PDS90

- Made of AISI 304 stainless steel
- Non-slip coating Inox matte finish
- High resistance to mechanical damage
- High resistance to corrosion and rust
- Fall to the drain
- Easy to clean
- Exceptional durability and reliability
- Easy to assemble
- Certificate of the Polish Institute of Hygiene
- CE declaration of conformity
- National Declaration of Performance

Material	Stainless steel 304
Dimensions	900X900X30 mm
Finishing	Inox 304 Matt

The non-threshold, accessible paddling pool for the disabled is a product made of the highest quality AISI 304 stainless steel, which is characterized by high durability, resistance to mechanical damage and insensitivity to rust and corrosion. The top layer of the paddling pool is smooth and has a non-slip surface to prevent accidents. The total dimension of the ramp area is 776x 776mm. Importantly, the PDS90 shower tray is certified by the Polish Institute of Hygiene, CE Declaration of Conformity and the National Declaration of Performance.
