Design	Vandal-proof execution
Material	AISI 304
Lock	Key
Dimensions	280 x 345 x 102 mm
Window	Tak
Capacity	400/600 towels capacity
Includes	Mounting kit included, key included

## Brushed stainless steel ZZ-fold paper towel dispenser – model C7102S

The **C7102S ZZ-fold towel dispenser** is a professional sanitary equipment element made entirely of high-grade stainless steel. The use of high-rigidity metal ensures the construction's resistance to deformation and intensive use in public spaces. This model features a vandal-proof design, which guarantees the preservation of aesthetics and full functionality even in facilities with the highest traffic intensity. Operational parameters and MAKOINSTAL dispenser efficiency

The device is characterized by high efficiency, holding **from 400 to 600 ZZ-type towel sheets**, which allows for less frequent refills. The front part of the housing features a **viewing window** for checking the paper level, enabling quick verification without the need to open the dispenser. The satin finish of the brushed steel effectively limits the visibility of minor scratches and fingerprints, making it easier to keep the surface clean. Security and technical specifications of the C7102S model

**The C7102S model is lockable with a key**, which secures the content against unauthorized access. Compact dimensions (280x348x102 mm) allow for the installation of the device even in limited spaces while maintaining full ergonomics. Precisely finished edges and solid welds eliminate the risk of accidental cuts during paper retrieval or maintenance activities.

The **MAKOINSTAL** product is delivered as a complete set ready for wall installation. The dispenser was designed for office buildings, medical facilities, and shopping centers, where high resistance to corrosion and cleaning agents is required.

The device has all the necessary documents for use in public utility buildings, including the **PZH hygienic certificate** and the **National Declaration of Performance (KDW)**.

The package includes a complete mounting kit and instruction manual, which confirms the highest quality of workmanship and compliance with current sanitary and building standards. **Our offer also includes a polished (gloss) stainless steel version with the code C7102C.**
