The shower curtain rail is a rust and moisture resistant product that can be installed in the shower area. The presented bar is made of AISI 304 acid-resistant steel. The surface finish of the bar can be polished (Product ID PSP 901) or matt (Product ID PSM 901). Moreover, the tube used for production has a diameter of 25 mm and its wall thickness is 1.5 mm. The total dimensions of the steel shower rail are 900 x 900mm. In addition, the bar has two mounting points - flanges, which have as many as 3 holes each. Such number of mounting holes guarantees stability and durability of use.
