Elbow soap and disinfectant dispenser – wall mounted stainless steel AISI 304 ST88S 500ml

The **ST88S elbow dispenser** with a 500 ml capacity is a professional-grade, compact solution designed for facilities with high sanitary requirements. Made of premium **AISI 304 stainless steel** with a brushed finish, this **medical hand dispenser** provides exceptional durability and resistance to aggressive chemical agents. Its 500ml size makes it a perfect fit for medical offices, dental clinics, and sanitary zones where space is limited but high professional standards are mandatory.

Compact medical elbow dispenser – reliable 500ml wall dispenser

This robust **500ml hand disinfectant dispenser** is the ideal choice for environments where a professional equipment standard is required. The solid construction with an elbow-operated arm ensures reliable performance and eliminates direct hand contact, significantly improving safety and hygiene. As a **professional elbow dispenser**, the ST88S model features a built-in level indicator and a **secure key lock system** to prevent unauthorized access to the liquid.

Technical Specification:

- **Material:** AISI 304 stainless steel (brushed finish)
- **Capacity:** 500 ml
- **Dispensing system:** Elbow-operated (non-hand contact)
- **Application:** Liquid soap, disinfectant liquids, and gels
- **Security:** Vandal-resistant key lock
- **Installation:** Easy wall-mounted setup

Professional hygiene for healthcare and commercial spaces

Investing in the **ST88S 500ml stainless steel elbow dispenser** ensures long-term resistance to corrosion and heavy use. This compact wall dispenser is an essential component for healthcare environments, performing perfectly alongside other stainless steel restroom accessories such as paper towel dispensers and Jumbo paper holders. For accessible toilets, it is recommended to complete the setup with certified stainless steel grab bars for the disabled.
