The ACTION PROTECT 1600 SHAVER WHITE hairdryer with shaver socket is an elegant addition to any hotel room. The body of this stylish product is made of white and chrome elements. Hairdryer R510 hairdryer is equipped with the ElectroStop safety system.

ElectroStop is a built-in residual current device (RCD), designed to minimize the risk of accidental electric shock. Thanks to the use of the latest technology, the ElectroStop system responds already at 10 mA. This means that the system is more sensitive and effective than highly sensitive devices that respond at 30 mA.

What's more, the ACTION PROTECT 1600 SHAVER WHITE R510 dryers have four-fold protection in the form of:

- Auto-reset switch-off thermostat to prevent overheating
- Security on/off "Push" button to prevent unguarded operation
- Automatic on/off safety switch to stop operation when a hairdryer is inserted in the wall holder
- Residual current device in the wall holder (RCD)
