Handrail type	Hinged with leg
Handrail length	450x440x400 mm
Mounting height	460 mm
Tube diameter	Ø 25 mm
The wall thickness :	1,5 mm
Maximum capacity	180 kg
Hole diameter	Ø 12 mm
Number of fixing holes:	10
Includes	8x100 mm screws, 12x100 mm plugs

Tilting chair with leg for the disabled, intended for shower mounting. The chair is made of AISI 304 stainless steel, resistant to rust, corrosion and some acids. The 501 series seat has smooth edges, which means that its structure eliminates the possibility of accidental catching or injury.

What's more, the presented chair can be freely tilted upwards, thus, when the chair is folded, the maneuverability of the room increases. For the production of the seat 501AN, a tube with a diameter of 25 mm was used, with a wall thickness of 1.5 mm. The dimensions of the seat are 450x440x400 mm, while its maximum load capacity is 180 kg. In addition, the chair is available in two variants as to the surface finish:

- PSP 501AN, the polished variant;
- PSM 501AN, the matt variant.
