Open dimensions:	585 x 940 x 495 mm
Closed dimensions:	585 x 940 x 104 mm
Weight	28,5 kg
Assembly	Wall
Includes	Mounting kit, key

A changing table for babies is an indispensable equipment in every public bathroom. Changing tables are most often installed in train bathrooms, bathrooms at gas stations, in shopping malls or hotels. The offered changing table BCTHW is made of AISI 304 stainless steel (external part, housing) and polyethylene (internal part, changing zone).

The contoured design of the changing table ensures the safety of the child, and the attached strap prevents the child from accidentally sliding off the changing table. The material from which the inner zone of the changing table was made - polyurethane - has antibacterial properties, thanks to which the entire surface is easy to clean and safe even for the youngest children. On the other hand, the outer part, which is made of steel, is vandal-resistant and has a high resistance to corrosion and rust.

The dimensions of the changing table count:

- close: 585mm, 940mm, 104mm
- open : 85mm, 940mm, 495mm.

Its total weight is 28.5 kg, with a maximum payload/load capacity of 25 kg. A mounting kit for wall mounting is included in the package. Moreover, the offered changing table has the CE Declaration of Conformity and the National Declaration of Performance.
