

Wall Mounted Electronic Photocell 2519

- Suitable for accessible walls
- Infrared sensor with activation on presence detection
- Vandal-proof stop after 1 min of continuous flow
- Automatic anti-legionella water flow every 24h after last use
- Aerator with 2 l/min flow limiter

Power	4xAA Battery (2519B) or 230V AC 6V DC Power Adapter (2519R)
Connector	G1/2
Temperature	5-70°C
Design	Brass covered with chrome
Water time flow	2 l/min
Start	Infrared sensor with presence detection function
Operating pressure	Min - 0,5,max - 6 bar
Spout	With vandal-resistant aerator

The 2519 series wall mounted touchless washbasin tap is a modern and hygienic solution designed for public facilities and high standard bathrooms. The device structure is adapted for stable wall mounting, including installations on plasterboard surfaces.

The 2519 series offers two power supply variants tailored to the technical specifications of the building. The 2519R model utilizes mains power via a 230V AC 6V DC power adapter, while the 2519B model is powered by 4xAA batteries, making it an ideal choice for locations without a direct electrical connection. Both variants are characterized by exceptional water efficiency, maintaining consumption at a level of only 2 liters per minute.

The electronic tap is equipped with a professional anti limescale strainer and an advanced mechanism made of components with anti-sediment properties. The applied anti limescale system effectively protects the interior of the device against scale buildup, significantly extending the lifespan of the valve and ensuring trouble free operation in high traffic areas. A key functionality that enhances sanitary standards is the possibility of periodic Anti Legionella thermal disinfection, which guarantees effective cleaning and the highest level of water hygiene.

The solid body made of high quality brass and finished with a chrome layer is highly resistant to corrosion and mechanical damage. The vandal resistant design combined with an economical water flow of 2 l per min makes the 2519 series perfect for intensive use environments. Every wall mounted tap from the 2519 series holds the Polish National Institute of Hygiene certificate, CE Declaration of Conformity, and the National Declaration of Performance.
