

## Slider C9900

- AISI 304 acid-resistant steel
- Resistant to rust, corrosion and some acids
- Can be installed in a room exposed to moisture
- Wall mounting
- Vandal-proof construction
- Safe brake
- Height adjustment
- Reliable durability

**Housing** AISI 304 stainless steel

**finish** Matt

**Dimensions** 320 x 975 x 76 mm

Slider for adjusting the height of pool dryers. The slider has been adapted to the Magnum H series dryers. for moisture, e.g. swimming pool changing rooms. The offered slider has a total size of 320 x 76 x 975 mm (without the dryer installed).

The connection to the electric network is external. The height adjustment field of the mounted dryer is 375 mm - this means that the height of the mounted dryer can be adjusted to both a child and an adult.

The whole structure is vandal-proof, and what's more, it has a safe brake, thanks to which there is no risk of the dryer falling spontaneously. In addition, the whole thing has been designed so that the internal counterweight makes it easier to raise and lower the installed product from the H series.
