A handrail for the disabled is a product with universal application, providing comprehensive equipment for any room. The offered white handrail fi25 has been created with the needs of disabled individuals and anyone requiring mobility support in mind.

The handrail is made of high-quality carbon steel, powder-coated in white. The tube diameter used is 25 mm, and the length is 800 mm. The maximum load capacity of the prepared handrail is 180 kg. Moreover, all handrails have smooth edges, meaning their construction eliminates the risk of accidental hooking or injury. Each handrail comes with an installation kit, which includes:

- Screws
- Washers
- Expansion plugs
- Caps

The set also includes an instruction manual and a warranty card. The offered handrails are certified by the Polish Institute of Hygiene, and have a CE Declaration of Conformity, and a National Declaration of Performance, confirming their high quality and compliance with standards.
