

## Suszarka do rąk MKUVSA

- Housing made of premium **AISI 304 stainless steel**
- Elegant black finish
- Housing resistant to moisture, corrosion, rust, and selected chemicals
- Quiet operation – only **70 dB**
- **360° UVC system** supporting the sterilization of the internal airflow
- Fast hand drying in approximately **12 seconds**
- Energy-efficient operation
- **HEPA filter**
- **IPX3** protection rating
- Low power consumption
- Ideal for high-traffic public washrooms
- Powerful warm airflow removes water from hands quickly and efficiently
- High-speed next-generation motor
- Automatic shut-off after **60 seconds** of continuous operation
- Advanced technology for fast and gentle hand drying
- Modern design
- Environmentally friendly
- Easy and quick to clean and disinfect

Housing	Stainless steel AISI 304
Finish	Black
Action	Photocell
Dimensions	183 x 275 x 162 mm
Tension	220 – 240 V, 50/60 Hz
Total power	1000 W
Volume level	70 dB
Air velocity	396 km/h
Drying time	~12 s
Energy class	IPX3
Weight	2,2 kg

## Automatic Hand Dryer with UV Lamp and HEPA Filter – Black Stainless Steel

The **MKUVSA automatic hand dryer** is a modern solution designed for high-traffic washrooms, including offices, schools, hospitals, hotels, restaurants, and other public facilities. Equipped with an infrared sensor, it provides touch-free operation, ensuring a high level of hygiene and user convenience.

Elegant Black Housing Made of AISI 304 Stainless Steel

The housing is manufactured from high-quality **AISI 304 stainless steel** with a thickness of **1.2 mm** and finished in an elegant **black coating**. This material offers excellent resistance to corrosion, mechanical damage, and vandalism, making the dryer an ideal choice for heavily used public washrooms.

The hand dryer features an **IPX3 protection rating**, providing protection against water spray and ensuring safe operation in sanitary environments.

Fast and Hygienic Hand Drying

The **MKUVSA** is equipped with a **HEPA filter** and a **UV lamp**, helping to maintain a high level of hygiene during hand drying by reducing contaminants in the airflow. With a rated power of **1000 W**, the dryer delivers an air speed of up to **396 km/h**, allowing hands to dry in approximately **12 seconds**.

The maximum air temperature reaches approximately **50°C**, while at a distance of 10 cm from the air outlet it drops to around **25°C**, ensuring comfortable use. The noise level does not exceed **70 dB**, and the built-in safety system automatically switches the unit off after **60 seconds** of continuous operation.

MKUVSA Hand Dryer – Applications and Certifications

The **MKUVSA black hand dryer** is an excellent choice for modern washrooms in office buildings, hotels, restaurants, schools, hospitals, and other public facilities. Its elegant black finish, durable construction, and touch-free operation make it a perfect addition to contemporary sanitary spaces. Every **MKUVSA hand dryer** is supplied with a **CE Declaration of Conformity** and a **National Declaration of Performance**, confirming compliance with applicable quality and safety standards.
