The hotel&HASH39;s ACTION PROTECT 1600 BLACK dryer is an elegant addition to any hotel room. The body of this stylish product has been equipped with black and chrome elements. The R505A dryer is equipped with the ElectroStop safety system.

ElectroStop, i.e. a built-in residual current device (RCD), designed to minimize the risk of accidental electric shock. Thanks to the use of the latest technology, the ElectroStop system responds already at 10 mA. This means that the system is more sensitive and effective than highly sensitive devices that respond at 30 mA.

What&HASH39;s more, the black ACTION PROTECT 1600 BLACK R505A dryers have four-fold protection in the form of:

- Auto-reset switch-off thermostat to prevent overheating
- Security on/off "Push" button to prevent unguarded operation
- Automatic on/off safety switch

to stop operation when a hairdryer is inserted in the wall holder

- Residual current device in the wall holder (RCD)
