

## Wall Mounted Electronic Photocell 9075

- Suitable for accessible walls
- Infrared sensor with activation on presence detection
- Vandal-proof stop after 1 min of continuous flow
- Automatic anti-legionella water flow every 24h after last use
- Solenoid valve 6V (behind wall)
- Aerator with 6 l/min flow limiter

Power	Battery 4xAA or 230V
Connector	G1/2"
Temperature	5-70°C
Design	Brass covered with chrome
Water time flow	6 l/min
Start	Infrared sensor with presence detection function
Operating pressure	Min - 1 - max - 8 bar
Spout	With vandal-resistant aerator

The touchless faucet model 9075 is designed for wall mounting, including on drywall surfaces. Its construction allows for quick and easy installation. Equipped with an infrared sensor (photocell), the faucet automatically activates water flow upon detecting motion within the sensor's range. The water-saving system limits continuous flow to 1 minute, after which the valve automatically shuts off. The faucet body is made of corrosion-resistant brass, coated with a layer of chrome, ensuring high durability and resistance to mechanical damage. The device is intended for use with both hot and cold water supply systems.
