Capacity	300-400 towels
Includes	Mounting kit included, key included

White ZZ Paper Towel Dispenser – ABS | Model B7101

The **B7101 ZZ paper towel dispenser** is a universal solution designed for public facilities where maintaining high hygiene standards while optimizing operating costs is key. Made of **durable ABS plastic** in white, the device features an aesthetic appearance and high resistance to scratches and mechanical damage. This product is dedicated to restrooms in medical facilities, educational institutions, and office buildings.

Functionality and Efficiency in Public Spaces

The compact design, measuring 270 x 270 x 130 mm, has been optimized for standard ZZ-type paper towel refills. The dispenser's interior holds between 250 and 400 sheets, ensuring an adequate supply of consumables even in bathrooms with medium to high traffic. Thanks to the smooth surface structure of the housing, keeping the device impeccably clean is extremely simple and does not require specialized chemical agents.

Security and Inventory Control

The B7101 model is equipped with a **cylinder lock with a key**, effectively protecting the refill against theft and unauthorized access. The front panel features a functional inspection window, allowing staff to monitor the amount of remaining paper without opening the housing. The rounded edges of the dispenser increase user safety, which is particularly important in facilities such as kindergartens or schools.

Comprehensive Equipment for White Barrier-Free Bathrooms

Choosing a white dispenser allows for a coherent and sterile arrangement of the sanitary space. The B7101 model is an ideal addition to professional equipment. For full visual harmony, it is recommended to pair it with [white ABS soap dispensers](#) and the dedicated [B7401 toilet paper dispenser](#). In restrooms adapted for people with disabilities, the entire setup should be supplemented with certified [white 32 mm grab bars](#) or their economical version, [white 25 mm grab bars](#). Such a complete set guarantees durability, safety, and an aesthetic look for any public bathroom.
