Start	By means of the button
Water pressure reductor	up to 6l / min.
Water temperature	5-65°C
Water pressure	Min 0,5 bar - Max 6 bar (Recommended 2-4 bar)
Contains	Battery, mounting kit

Shower tap for concealed installation. The tap has one G1 / 2 connection for cold or mixed water. The body of the faucet is made of brass covered with a layer of chrome. A single outflow of water in the 9006 shower tap takes about 15 - 25 seconds. The amount of water consumed at the outlet is approx. 6 l / m, at a water connection pressure of 3 bar. The connection pressure can be from 0.5 to 6 bar, however, the recommended connection pressure should be from 2 to 4 bar.

The 9006 tap is available in two convenient variants:

- 9006 universal variant, equipped with one 1/2 connection and a cup, a water flow reducer, and an adjustment hole;
- 9006AB variant with an integrated anti-block system, which includes a cup and a flow reducer. The option to adjust the water flow time is not available.
