

INSTRUCTIONS FOR USE OF ACCESSORIES
BATHROOM AND HOTEL MAKOINSTAL S.C.

1.	Steel baskets	<i>Do not use aggressive, abrasive or corrosive agents for cleaning. Use cleaning agents. Intended for cleaning stainless steel. It is not recommended to place the basket near the toilet / urinal (drops urine formed by permanent stains on the steel surface)</i>
2.	Metal and plastic soap dispensers	Do not use aggressive, abrasive or corrosive agents for cleaning. Plastic dispensers should be washed with soap and water and wiped dry. Stainless steel dispensers should be cleaned with a cleaner designed only for stainless steel. Do not allow the soap to crystallize by not using the dispenser for a long time. Dried soap can clog the drain or pump. In this case, flush the system with hot water by pressing the dispenser pump repeatedly. Do not use saline liquid soaps in soap dispensers. Using this type of soap will void your warranty. Steel dispensers should be filled with liquid soap below the counter screw inside. Do not allow soap to flood the rear wall of the dispenser. In the event of flooding or leaving soap on the housing, the resulting rust should be cleaned as soon as possible with an abrasive needled cloth.
3.	Paper towel dispensers w steel and plastic housing	The plastic tray should be washed with soap and water and wiped dry. Stainless steel feeder: use cleaning agents for cleaning stainless steel. Do not use aggressive, abrasive and corrosive.
4.	Steel and plastic hand dryers	The dryer should be installed and used in accordance with the enclosed instructions and warranty conditions. In the event of a fault, please contact the service center (phone number in the warranty card). When performing maintenance, disconnect the device from the power supply and then wipe it damp cloth and wipe dry. Do not use aggressive, abrasive or corrosive agents. In the case of housing with stainless steel, use cleaning agents designed to clean stainless steel.
5.	Steel toilet brushes	Do not use aggressive, abrasive or corrosive agents for cleaning. Use cleaning agents. Intended for cleaning stainless steel. It is not recommended to place the brush near the toilet / urinal (drops urine cause permanent discoloration of steel). After disinfection / cleaning of the container and brush, rinse them under running tap water. The brush drip cannot be filled with water or caustic / cleaning agents.
6.	Bathroom faucets	Do not use aggressive, abrasive or corrosive agents. Use cleaning products intended for cleaning stainless steel.

7.	Metal hotel accessories	Do not use aggressive, abrasive or corrosive agents. Use cleaning products intended for cleaning stainless steel.
8.	Plastic products	Do not use aggressive, abrasive or corrosive agents for cleaning. Wash only with soap and water, a soft cloth and wipe off to dry.
9.	Other products made of steel stainless or chrome plated	Do not use aggressive, abrasive or corrosive agents for cleaning. Use cleaning agents intended for cleaning stainless steel.
